Research Interests	<p>As Moore's Law fades, what will be the next-generation AI system that can overcome the conflict between surging computational needs and scarce hardware resources? Inspired by this question, my current research focuses on building low-cost, high-efficiency machine learning systems that can be deployed to serve a wide range of scenarios.</p> <p>Specifically, I identify performance bottlenecks, opportunities, and challenges in the system, and leverage technologies such as online learning to address the performance- and resource-oriented problems. My works aim to harness hardware resources, automate the operation of complex systems, and enhance the efficiency of systems (e.g., retrieval augmented generation).</p>	
Education	<p>University of Southern California, Los Angeles, CA, United States <i>Incoming Ph.D. Student in Computer Science</i> from August 2025</p> <p>Nankai University, Tianjin, China <i>Master in Computer Science</i> (Exempted from Entrance Exam) August 2022 – Present Advisor: Professor Yusen Li GPA: 3.63/4.0 Thesis: Automated Performance Tuning Techniques for Parallel Applications</p> <p>University of Science and Technology Beijing, Beijing, China <i>Bachelor in Information Management and Information System</i> August 2018 – June 2022 Major GPA: 3.97/4.0 Cumulative GPA: 3.89/4.0</p> <p>Southern Taiwan University of Science and Technology, Taiwan, China <i>Major in Information Management</i> (Exchange Program) September 2019 – January 2020 Cumulative GPA: 4.3/4.3</p>	
Research Experience	<p>University of Illinois at Urbana-Champaign, Urbana, IL, United States <i>Retrieval-Augmented Generation</i> May 2024 – Present Working with Professor Minjia Zhang on GPU-enhanced retrieval augmented generation, shedding lights on key concerns like batching strategies and latency-quality tradeoffs.</p> <p>Nankai University, Tianjin, China <i>Datacenter, System, Machine Learning for System</i> August 2022 – Present Working with Professor Yusen Li on automatic performance tuning and hardware resource isolation for job collocations within multi-core systems.</p> <p>Ant Group, Beijing, China <i>Vector Retrieval, Vector Database Optimization</i> June 2023 – January 2024 Worked as a research intern under Dr. Jianguo Li and Wen Hu on optimizing AI infrastructure - vector database, enhancing CodeFuse services (a coding large language model platform).</p> <p>University of Chinese Academy of Sciences, Beijing, China <i>Mixed Integer Programming, Heuristic Algorithm</i> September 2020 – September 2021 Worked as an undergraduate research assistant under Professor Guanghui Zhou to develop data-driven combinatorial optimization problem (vehicle routing optimization).</p>	
Publications	<p>Performance Tuning</p> <p><i>*Denotes equal contribution. †Denotes corresponding authorship.</i></p>

Research Projects

Qiyuan Laboratory Innovation Fund November 2023 – November 2024
Worked as a core member on resource isolation mechanism for a multi-tenant cache system (i.e., Cachelib by Facebook).

CCF-Ant Research Fund on Green Computing January 2023 – January 2024
Worked as a leader to write project proposal and conclusion, conduct research on AI infrastructure (vector database optimization) and practical platform deployment.

National Natural Science Foundation (NSF) of China January 2023 – Present
Working as a core member on improving resource utilization in cloud with QoS guarantee.

Major Project of National NSF of China December 2022 – Present
Working on real-time scheduling of cluster robots for major equipment manufacturing.

Honors And Awards

Ph.D. Student Fellowship, USC	2025
1st-Class Gongneng Scholarship, Nankai University	2023, 2024
National 3rd Prize, Massive Storage Competition	2022
Provincial Gold Prize, 'Internet+' Innovation and Entrepreneurship Competition	2021
Excellent Student, University of Science and Technology Beijing (USTB)	2020
National 2nd Prize (1493/41826 = top 3.6%), Contemporary Undergraduate Mathematical Contest in Modeling	2020
2nd Place, Marketing Competition (turnover RMB 20,000+), USTB	2020
Top Ten Singers on Campus, USTB	2020
Professional Certification in E-Commerce, Taiwan Computer Skills Foundation (CSF)	2019
Certification of Enterprise Electronic Assistant Planner, Taiwan CSF	2019
Team Gold Award, College Students' Social Practice, USTB	2019

Talks And Services

Reviewer for
the 2025 ACM Web Conference.

Conference Talk at

the 40th ICDE at Utrecht, the Netherlands, May 2024;
the 52nd ICPP, Online, August 2023.

Teaching Assistant for

Computer Architecture (Fall 2023); C++ (Spring 2024).

Reading Group Founder and Leader for

Machine learning system research at Nankai-Baidu Joint Lab (from October 2024).
